## Office Furniture Made in Italy

---

Our chairs have always meant excellence for their aesthetics, functionality, quality of materials, solidity and comfort, and, above all, for the creative and manufacturing processes that are the basis of each collection. That special "Made in Italy" touch has made all our products special for over sixty years, because it is not simply fulfilling a need or providing a solution to a furnishing problem but they represent a real choice of style: ICF style. This is the reason why we are proud of them.

Da sempre le nostre sedute rappresentano un'eccellenza non solo per l'estetica, la funzionalità, la qualità dei materiali, la solidità, il comfort ma anche per tutti i processi creativi e produttivi alla base di ogni collezione. E' quel tocco di "Made in Italy" che rende in nostri prodotti speciali da oltre sessant'anni perché non si limitano a rispondere ad un'esigenza o a risolvere un problema d'arredo, ma rappresentano una vera e propria scelta di stile: lo stile ICF. Per questo ne siamo orgogliosi.

# The VALEA Collection

Comfort generates from elegance: this is the essence of the VALEA collection, a series of different sizes and models of armchairs to satisfy a range of needs.

The collection's distinctive feature is its curved, essential aluminium structure, the base of a completely padded seat covered in fabric or leather to "envelope" the user in comfort. An authentically relaxing chair.

Comfort sublimato dall'eleganza: è questa l'essenza della collezione VALEA, una serie di poltrone declinate in dimensioni e modelli differenti per soddisfare le più diverse esigenze.

Elemento distintivo della collezione è la struttura in alluminio, sinuosa ed essenziale, su cui poggia una seduta completamente imbottita e rivestita in tessuto o in pelle per "avvolgere" in tutta comodità chi la utilizza. Un vero e proprio invito al relax.

Exceptional attention has been paid not only to ergonomic aspects but also to the idea and development of every detail involved in form and function. VALEA chair offers a series of mechanical devices that improve comfort when you are seated even for a significant number of hours. Since the height of the seat can be adjusted as desired, the body assumes the correct position. VALEA chair can be equipped with a mechanism that returns the seat to its original position, so that the office always presents an orderly image.

## Tilting Mechanism

Valea Chair has a simple, very effective tilting mechanism that promotes movement and provides a high level of comfort, reducing stress and strains. The rearward seat tilting mechanism pivots from the front of the chair, so that the angle is downward motion, relieving leg stress points and allowing stability in foot positioning on the rearward tilt. The tilting system has an adjustable tension control according to the user's weight and is lockable in various positions.

## Base

The 4 and 5 star base are made of die-cast aluminum available in polished and chromed finishing. The ICF custom base design is balanced well with the overall product design and gives particular attention to details.

### Padding / fabric or leather

The leather or fabric upholstery is welded onto flexible polyurethane. The sheet thus obtained has a series of typical horizontal stripes and fits to perfectly distribute the weight of the body.

### Armrests

They have a closed shape and are made of die cast aluminum available in polished or chromed finishing.

### Auto-return mechanism

The 4 star base has a special column that allows free-swiveling in use and that automatically rotates backrest to a frontward facing position. The fixed height column helps to keep your meeting room always in an ordinate manner.

### Castors

Standard: body made of reinforced copolymer with chromed die-cast, zamak hood; twin-wheels reinforced copolymer soft treads, suitable for all floors.

### Height adjustment

The 5 star base model has a height adjustment column that allows to adjust the chair individually according to different heights of users and sitting habits. The heights adjustment column allows height regulation in any position along the total stroke through internal movement of gas. It is controlled by pulling up a simple, well visible and intuitive lever.

### Glides

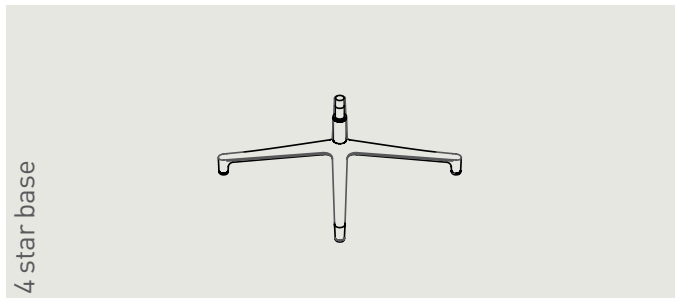

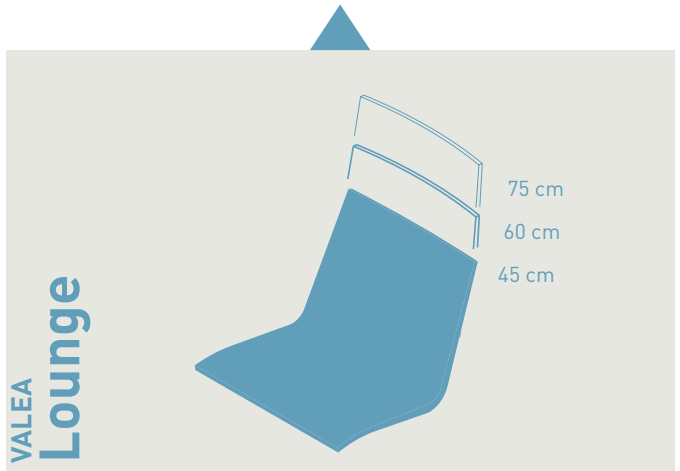

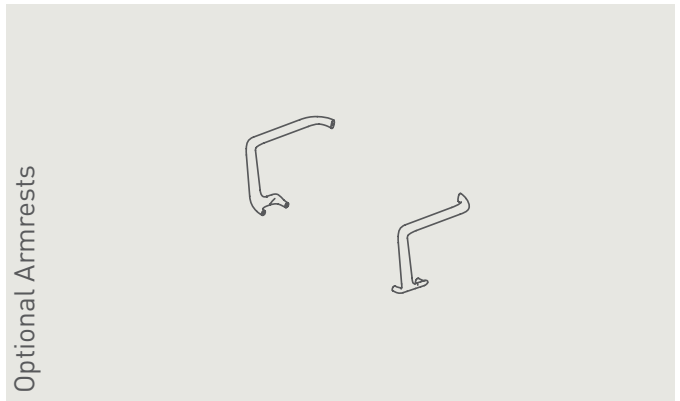

Standard black nylon base, white soft central elements, suitable for all floors.
