LANDE

Teska

Michiel van der Kley

**A table to gather round.**

Teska is a table that invites you to gather around it and relax. Sturdy, robust and yet, thanks to its rounded shape, slightly soft. There are no angles but flowing lines and curves. And it has a frame that you simply can't ignore – massive and as strong as a tree-trunk. This is a real table! Just sit down, alone or with the entire team, to share, laugh and, of course, for more serious work.

Teska's veneered column leg makes its appearance authentic and recognisable. You can link tables together and make them as long as you want.

Teska. A welcoming sight in company restaurants, libraries, schools and meeting rooms.
